Yemen has a long and rich history, stretching back millennia, but it is still *terra incognita* to most people. There is no other part of the Arabian Peninsula as rich in heritage, including architecture, irrigation works, inscriptions and a vital tradition of poetry, proverbs, music, dance and intellectual writing.

Yemen Update Redux is dedicated to providing a variety of past writing and images about Yemen's heritage. This includes selections from the earlier print edition of *Yemen Update* and other brief writings on Yemen and its people. Yemen's past lives on no matter the turmoil of the present.
